

## Flatbed / Plate Laser Cutting

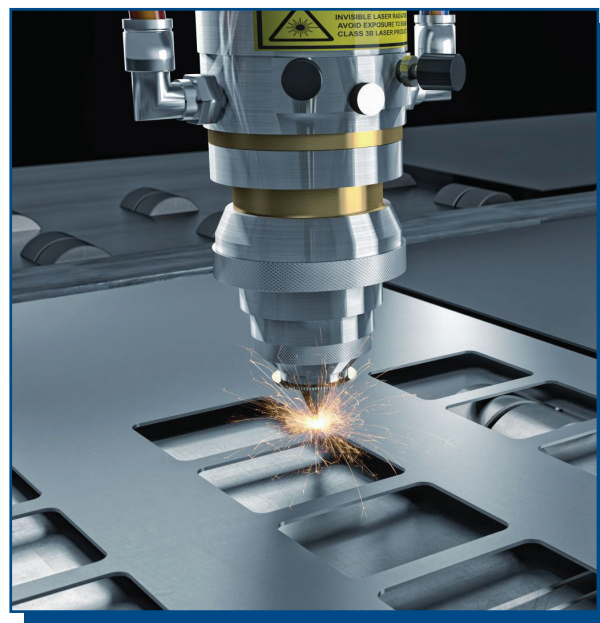

Our state of the art laser cutter provides a tolerance of 0.2 millimetres and cuts materials up to 20mm in thickness with minimal slag for ensuring the highest precision.

We also have the ability to etch part numbers and bending lines. Combining our expert drafting, fabrication and laser cutting knowledge, we have the ability to get your job done on time to your exact specifications.

Simmonds Laser team of draftsmen and detailers use a wide range of software including Tekla, SolidWorks & AutoCAD.

The variety of programs enables us to draw all of your parts, jobs and DXF files in the most efficient way possible.

MAX PLATE SIZE: 3000mm x 1500mm	
Materials	Thickness
Mild Steel	0.4mm to 20mm
Aluminium & Stainless Steel	0.4mm to 8mm
Brass & Copper	0.4mm to 6mm

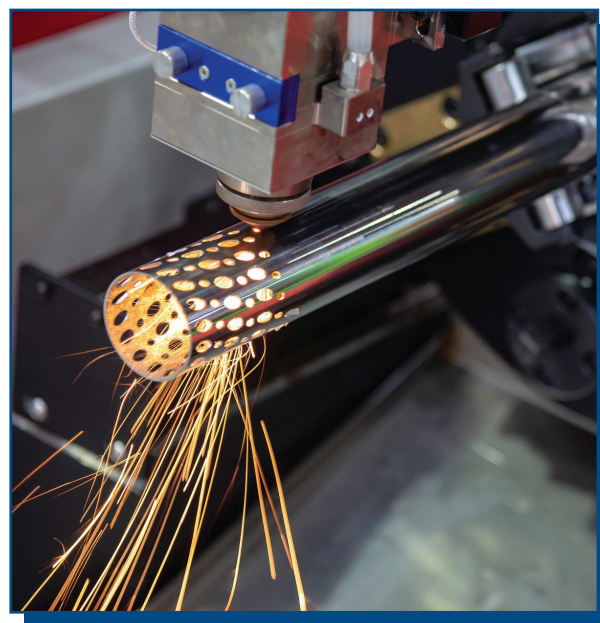

## 3D Tube Laser Cutting

Simmonds Laser and Tube Cutting service is one of the few in Perth offering a new way of fabricating. Tube cutting is an extremely efficient way to prepare your material. We offer a fast turnaround, material supply and delivery.

*Suitable for:*

Light Structural Steel Suppliers, Balustrade Fabricators, Pipe and Flange Fabricators, Stainless Steel Specialists, Sheet Metal Fabricators and Fencing Companies.
